

Hot Wings Tatarian Maple

Acer tataricum 'GarAnn'

Height: 25 feet

Spread: 15 feet

Sunlight:  

Hardiness Zone: 3

Description:

A spectacular new addition for smaller home landscapes, this is a smaller accent tree that features blazing red hot seeds in late summer and fiery fall colors; more tolerant of drought and alkaline conditions than the otherwise similar Amur maple

Ornamental Features

Hot Wings Tatarian Maple is primarily grown for its highly ornamental fruit. It features abundant showy cherry red samaras from mid to late summer. It has dark green deciduous foliage. The lobed leaves turn outstanding shades of yellow, orange and red in the fall.

Landscape Attributes

Hot Wings Tatarian Maple is a deciduous tree with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance tree, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting birds and squirrels to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Messy

Hot Wings Tatarian Maple is recommended for the following landscape applications;

Planting & Growing

Hot Wings Tatarian Maple will grow to be about 25 feet tall at maturity, with a spread of 15 feet. It has a low canopy with a typical clearance of 4 feet from the ground, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for 70 years or more.

This tree does best in full sun to partial shade. It prefers to grow in average to dry locations, and dislikes excessive moisture. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This is a selected variety of a species not originally from North America.
