

Globe Blue Spruce

Picea pungens 'Globosa'

Height: 4 feet

Spread: 5 feet

Sunlight:

Hardiness Zone: 2

Other Names: Blue Colorado Spruce; Colorado Blue Spruce

Description:

A small, dense globe-shaped shrub, very unlike the species, as a mounded form that eventually becomes a compact and dense Christmas tree-like shape, adaptable and hardy; intensely blue needles, an excellent choice for form and color in the garden

Ornamental Features

Globe Blue Spruce is a dwarf conifer which is primarily valued in the landscape or garden for its distinctively pyramidal habit of growth. It has attractive blue evergreen foliage which emerges silvery blue in spring. The needles are highly ornamental and remain blue throughout the winter.

Landscape Attributes

Globe Blue Spruce is a dense multi-stemmed evergreen shrub with a distinctive and refined pyramidal form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a relatively low maintenance shrub. When pruning is necessary, it is recommended to only trim back the new growth of the current season, other than to remove any dieback. It has no significant negative characteristics.

Globe Blue Spruce is recommended for the following landscape applications;

- Vertical Accent
- General Garden Use

Planting & Growing

Globe Blue Spruce will grow to be about 4 feet tall at maturity, with a spread of 5 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for 60 years or more.

This shrub does best in full sun to partial shade. It prefers dry to average moisture levels with very well-drained soil, and will often die in standing water. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
