

## Summer Wine Ninebark *Physocarpus opulifolius 'Seward'*

Height: 6 feet

Spread: 6 feet

Sunlight: ○

Hardiness Zone: 3

Other Names: Eastern Ninebark

### Description:

This stunning garden shrub has all the charm and color of its parent Diablo but in a significantly more compact form; foliage emerges a wine-red and fades to reddish-purple, setting apart the showy white flowers in spring, also has curious peeling bark

### Ornamental Features

Summer Wine Ninebark features showy clusters of white flowers at the ends of the branches from late spring to early summer, which emerge from distinctive pink flower buds. It has attractive deep purple deciduous foliage which emerges crimson in spring. The serrated lobed leaves are highly ornamental and turn an outstanding red in the fall. It features abundant showy red capsules from early to mid fall. The peeling tan bark and dark red branches add an interesting dimension to the landscape.

### Landscape Attributes

Summer Wine Ninebark is a multi-stemmed deciduous shrub with a more or less rounded form. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. It has no significant negative characteristics.

Summer Wine Ninebark is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- Rock/Alpine Gardens
- General Garden Use

### Planting & Growing

Summer Wine Ninebark will grow to be about 6 feet tall at maturity, with a spread of 6 feet. It has a low canopy, and is suitable for planting under power lines. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selection of a native North American species.
