Height: 4 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 3

Group/Class: Floribunda Rose

Description:

Striking red streaks and spots stand out on pale yellow flowers that mature to cream; visually stunning on the landscape, and in containers; more yellow in cooler temperatures; an exciting addition to the garden or patio

Ornamental Features

George Burns Rose features showy lightly-scented double yellow flowers with creamy white overtones, gold eyes and red streaks at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has dark green deciduous foliage. The large oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

George Burns Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

George Burns Rose is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Container Planting

Planting & Growing

George Burns Rose will grow to be about 4 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.

George Burns Rose makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
