TAGAWA gardens

Dragonhead

Dracocephalum ruyschiana

Plant Height: 8 inches

Flower Height: 12 inches

Spread: 18 inches

Sunlight: ○ ◐

Hardiness Zone: 3

Ornamental Features

Dragonhead has masses of beautiful spikes of blue hooded flowers rising above the foliage in early summer, which are most effective when planted in groupings. Its narrow leaves remain forest green in color throughout the season.

Landscape Attributes

Dragonhead is an herbaceous perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and is best cleaned up in early spring before it resumes active growth for the season. It has no significant negative characteristics.

Dragonhead is recommended for the following landscape applications;

- Mass Planting
- General Garden Use

Planting & Growing

Dragonhead will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 18 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 8 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

TAGAWA gardens

This plant does best in full sun to partial shade. It prefers to grow in average to dry locations, and dislikes excessive moisture. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This species is not originally from North America. It can be propagated by division.
