Plant Height: 8 inches

Flower Height: 12 inches

Spread: 12 inches

Sunlight: ○ ◐

Hardiness Zone: 5

Other Names: Dragon's Head

Description:

A low growing and compact mounded selection presenting mounds of narrow, needle-like foliage with long blooming, deep violet-blue flowers rising above; drought tolerant once established, perfect for rock gardens, borders or containers; low maintenance

Ornamental Features

Fuji Blue Dragonhead has masses of beautiful spikes of violet hooded flowers with blue overtones and powder blue edges rising above the foliage in mid spring, which are most effective when planted in groupings. Its narrow leaves remain green in color throughout the season.

Landscape Attributes

Fuji Blue Dragonhead is an herbaceous perennial with a mounded form. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This plant will require occasional maintenance and upkeep, and is best cleaned up in early spring before it resumes active growth for the season. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading

Fuji Blue Dragonhead is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- General Garden Use
- Container Planting

Planting & Growing

Fuji Blue Dragonhead will grow to be about 8 inches tall at maturity extending to 12 inches tall with the flowers, with a spread of 12 inches. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 8 years. As an herbaceous perennial, this plant will usually die back to the crown each winter, and will regrow from the base each spring. Be careful not to disturb the crown in late winter when it may not be readily seen!

This plant does best in full sun to partial shade. It is very adaptable to both dry and moist locations, and should do just fine under typical garden conditions. It is considered to be drought-tolerant, and thus makes an ideal choice for a low-water garden or xeriscape application. This plant should not require much in the way of fertilizing once established, although it may appreciate a shot of general-purpose fertilizer from time to time early in the growing season. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.

Fuji Blue Dragonhead is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a mass of flowers against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
