Height: 4 feet

Spread: 3 feet

Sunlight: ○

Hardiness Zone: 5

Group/Class: Hybrid Tea Rose

Description:

Attractive, continuous blooming, multicolored double blooms of peachy apricot, with hints of pink, cream, and red on its ruffled petal edges; a compact variety that is disease resistant and easy to care for; ideal for smaller spaces, or flower beds

Ornamental Features

Euphoria Rose features showy lightly-scented double peach flowers with orange overtones, gold eyes and coral-pink edges at the ends of the branches from late spring to early fall, which emerge from distinctive yellow flower buds. The flowers are excellent for cutting. It has dark green deciduous foliage which emerges chartreuse in spring. The glossy oval compound leaves turn yellow in fall.

Landscape Attributes

Euphoria Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. It is a good choice for attracting bees to your yard. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spiny

Euphoria Rose is recommended for the following landscape applications;

- Accent
- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Euphoria Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. To help this plant achive its best flowering performance, periodically apply a flower-boosting fertilizer from early spring through into the active growing season. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
