Height: 3 feet

Spread: 4 feet

Sunlight: ○ ◐

Hardiness Zone: 6

Description:

This fast producing and vigorous variety is a nicely rounded mound of bright, colorful foliage, emerging yellow-green before transitioning to bright, fiery red; grown primarily for foliage; a great color contrast in the landscape or in containers

Ornamental Features

Sunjoy Fast Neo Japanese Barberry has attractive red foliage with hints of orange which emerges lime green in spring on a plant with a round habit of growth. The small oval leaves are highly ornamental and turn outstanding shades of orange and scarlet in the fall.

Landscape Attributes

Sunjoy Fast Neo Japanese Barberry is a dense multi-stemmed deciduous shrub with a more or less rounded form. Its relatively fine texture sets it apart from other landscape plants with less refined foliage.

This shrub will require occasional maintenance and upkeep, and should not require much pruning, except when necessary, such as to remove dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Spreading
- Spiny

Sunjoy Fast Neo Japanese Barberry is recommended for the following landscape applications;

- Mass Planting
- Border Edging
- General Garden Use
- Groundcover
- Container Planting

Planting & Growing

Sunjoy Fast Neo Japanese Barberry will grow to be about 3 feet tall at maturity, with a spread of 4 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a slow rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub does best in full sun to partial shade. It is very adaptable to both dry and moist growing conditions, but will not tolerate any standing water. This plant will benefit from an application of bonemeal and/or mycorrhizal fertilizer at the time of planting. It is not particular as to soil type or pH, and is able to handle environmental salt. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Sunjoy Fast Neo Japanese Barberry makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden. Be aware that in our climate, this plant may be too tender to survive the winter if left outdoors in a container. Contact our experts for more information on how to protect it over the winter months.

This plant is not reliably hardy in our region, and certain restrictions may apply; contact the store for more information.
