Green Mountain Boxwood

Buxus 'Green Mountain'

Height: 4 feet

Spread: 3 feet

Sunlight: ◐ ●

Hardiness Zone: 4

Description:

A compact hybrid broadleaf evergreen with a pyrimidal shape, makes a great accent hedge or garden detail plant, very popular and one of the hardier varieties

Ornamental Features

Green Mountain Boxwood is primarily valued in the landscape or garden for its ornamental globe-shaped form. It has rich green evergreen foliage. The small round leaves remain green throughout the winter.

Landscape Attributes

Green Mountain Boxwood is a dense multi-stemmed evergreen shrub with a more or less rounded form. It lends an extremely fine and delicate texture to the landscape composition which can make it a great accent feature on this basis alone.

This is a high maintenance shrub that will require regular care and upkeep, and can be pruned at anytime. It has no significant negative characteristics.

Green Mountain Boxwood is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- General Garden Use
- Topiary
- Container Planting

Planting & Growing

Green Mountain Boxwood will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub does best in partial shade to shade. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This particular variety is an interspecific hybrid.

Green Mountain Boxwood makes a fine choice for the outdoor landscape, but it is also well-suited for use in outdoor pots and containers. Because of its height, it is often used as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when grown in a container, it may not perform exactly as indicated on the tag - this is to be expected. Also note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.

Nursery Notes

Plant in morning sun only, a northeast location protected from afternoon sun is best.
