Height: 4 feet

Spread: 3 feet

Sunlight: ◐

Hardiness Zone: 4

Other Names: Wintercreeper Euonymus

Description:

A vigorous sprawling vine or mounded shrub featuring stunning gold variegated evergreen leaves all season long; a superb color accent for almost any garden or screening application

Ornamental Features

Canadale Gold Wintercreeper has attractive gold-variegated light green foliage on a plant with a spreading habit of growth. The glossy oval leaves are highly ornamental and remain light green throughout the winter. It produces pink capsules from mid to late fall.

Landscape Attributes

Canadale Gold Wintercreeper is a dense multi-stemmed evergreen shrub with a ground-hugging habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This shrub will require occasional maintenance and upkeep, and can be pruned at anytime. It has no significant negative characteristics.

Canadale Gold Wintercreeper is recommended for the following landscape applications;

- Mass Planting
- Hedges/Screening
- Rock/Alpine Gardens
- General Garden Use
- Groundcover

Planting & Growing

Canadale Gold Wintercreeper will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 30 years.

This shrub should be grown in a location with partial shade or which is shaded from the hot afternoon sun. It is very adaptable to both dry and moist locations, and should do just fine under average home landscape conditions. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments, and will benefit from being planted in a relatively sheltered location. This is a selected variety of a species not originally from North America.

Note:

Morning sun only. An east or northeast location is preferable.
